Designed for your profit

**Powerful service.
More efficiency.**

The EMCO Power Service.

E[M]CONOMY means: maximum efficiency and customer benefit. To fulfill this promise, EMCO not only offers excellent value for money but rather complete solutions precisely tailored to the budget and requirements of its customers. This includes outstanding customer service before, during and after purchasing the machines - known simply as the EMCO Power Service.

A basic service package with unrivalled benefits is included when you purchase your machine. A comprehensive network of highly skilled service engineers and efficient co-ordination processes via the hotline ensure rapid, fuss-free solutions.

EMCO also offers you the chance to tune your individual EMCO Power Service by choosing from various PowerPacks. These packages are calculated according to your individual needs and help ensure reliable operation, calculation and planning. They also contribute to a long and economic life-time and to a long-term maintenance of the machine's value. Using only original spare parts accounts significantly to this.

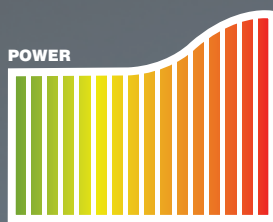

Powerful and long-lasting.

Service packages for all requirements. That's E[M]CONOMY!

Helping you to further improve the overall performance of your EMCO machines: After a precise evaluation of your needs, we calculate the ideal EMCO Service PowerPack for you, including the services that meet your business needs and requirements. Here are a few examples of how you can boost your EMCO Power Service:
